

# Grow Educators Build Resilience Deepen CCE

*When CCE goes beyond teaching of values  
and becomes a way of life.*

**Project 1** - Through strengths-based coaching, teachers discover their strengths and take ownership of designing lessons that are enriched through CCE pedagogy and facilitation strategies, thereby bringing CCE values to life in their students' holistic development and experiences.

**Project 2** - In partnership with NIE, Singapore, we co-design evidence-based learning experiences that harness the power of friendships to build resilience in students, equipping them with the socio-emotional skills to navigate challenges.

*Join us in shaping students for values-based learning and reach out to find out more about strengths-based coaching at the Presentation by NIE SCCCE & Greenridge Primary School!*
